

Level Monitoring Panel

TankScan | Powered by AquaPhoenix

Wired Sensors, No Batteries, **Cellular Connectivity**

The TankScan Level Monitoring panel is an inclusive 4G LTE cellular tank or silo level solution for tall tanks and silos. A level sensor of your choosing is wired into the panel eliminating the need for batteries. Optional local display can be added, as well as local alarms and/or pump permissive or interlock for overfill protection.

The panel is a durable weather-proof enclosure and can be expanded to serve 1 to 100s of additional tanks can be added with remote IO Panels or multiple main panels.

The TankScan wired sensor monitoring solution provides tank and silo level information anywhere an internet connection is available – via computer, tablet, or smart phone. Use the intelligence to optimize business decisions, and logistics by knowing when a tank or silo needs service. Plan deliveries and pick-ups based on the latest information to ensure optimal route efficiencies and maximum customer service.

Optimize your routes

Accurate tank data ensures just-in-time collections and deliveries.

Optimize your efficiencies

Reduce labor and transportation costs associated with manual tank measurement.

Optimize your growth

Add customers without having to add more trucks or drivers.

Optimize your service

Know when your customers' tanks need to be serviced before they do.
